
ExtraBackup Crack Free Download 2022

ExtraBackup Crack+ (LifeTime) Activation Code Free

ExtraBackup is a software app that helps you to back up and save your essential documents in a specified local/LAN or FTP location as ZIP files. It can also be used to restore backups to their original folder or to a custom one. Not too complicated to handle. The application is wrapped in a nicely colored and straightforward interface with intuitive settings. The guiding wizard makes sure it can be handled by any type of users, even those less experienced with such programs. All you have to do is import the files and folders that you want to back up using the built-in browse button, choose a title for your task, select your desired destination folder, and then proceed with the job. The main window displays the number of total created and running tasks.

Main functionality The program features ZIP compression to reduce storage space as well as the possibility to password-protect your items. The encryption algorithm is AES-256. Backup filters can be set to include only the specified files and exclude the others, or to remove the selected ones and automatically include the others. You can keep any number of previously backed up files. Other features ExtraBackup can be set to show a message in the system tray, send an e-mail or play a sound whenever a task has started, ended or aborted, as well as when you receive a warning or an error occurs. The sound can be selected from MP3 and WAV files present on your computer. You can choose how often the created tasks should run by using the Windows built-in task scheduler, the "Folder Monitor" option to run the task only when directory contents change, or "Smart Detect" to perform the job only when the specified disk is detected.

Last few words Taking everything into account, ExtraBackup proves to be a reliable and useful tool that lets you back up and save your private documents on your hard disk or an FTP location as ZIP files and protect them with a password. Do you find it annoying when you have to constantly sit up on the top of your desktop or on a small table in front of your PC monitor to do your work? Wouldn't it be great to be able to spend your valuable time on the tasks you actually like to do? The Pixela Keyboard is the only keyboard that's designed to be used as a "Workstation Alternative" and our mission is to allow you to use the freedom you have on the Pixela, the freedom to be seated and relaxed during your work day

ExtraBackup Free X64 [2022]

ExtracBackup is a simple and effective solution for Windows users to backup multiple files and folders. Easy to use, Use the built-in wizard to go through the setup quickly and then choose where you want to create your backup folder, which files and folders you want to include, and which actions you want performed after the backup creation. You can also create a backup as a ZIP file and have all your files and folders automatically stored as protected archive files.

ExtracBackup is a simple and effective solution for Windows users to back up their files and folders. With ExtracBackup, you can backup your important files in order to protect and save them. You can back up not only your regular files, but also ZIP archives or a whole folder, and save them to a local archive folder or to an FTP server. And it is all done with two clicks only, thanks to ExtracBackup GUI, that allows you to select and back up your preferred files and folders with one easy to use step. The program offers strong file compression in order to reduce disk space, but it can also make files unreadable when they are backed up, which means they are unreadable when they are saved elsewhere.

Main functionality ExtracBackup allows you to back up files and folders in two different modes: local and FTP. If you want to back up files and folders locally, you can select all the files and folders that you want to include in the backup by using the built-in file selector. Just click on the "New Backup" button to create the backup file and then all the selected files and folders. As for FTP, you can connect to the FTP server and enter the login and password to gain access to it. After you access it, all your files will be listed and you can then select all the files and folders you want to include in the backup. As for the FTP method, it is fairly common. Your files and folders are listed to you and you can then select and back up what you want. You can also create a ZIP archive of all your selected files and folders, which will then be automatically stored as a protected archive file. Another great feature of ExtracBackup is its built-in encryption and password protection. You can automatically compress all your files and folders by using the ZIP compression, or choose to use a custom password for the compression, in which case the compressed files will also be encrypted. Besides, the program offers many other useful features 09e8f5149f

ExtraBackup With Full Keygen X64

- Back up any file or directory on your computer to a remote FTP location: -Recover any file from your remote FTP location when necessary. -Automatically backup all files, including hidden files and folders name be restored to their original folder.

What's New In ExtraBackup?

The main advantage of this software is the customization of a wide range of settings. Users are given the opportunity to fully personalize the application and determine its operation in order to make it meet their needs. The included wizard guide is enough to start the configuration process. Answering all questions about the installation of this application, it is definitely worth taking advantage of such a solution and keeping up with the times. Good support and availability of technical documentation. All the files and info necessary to perform customization and settings are included in this solution. ExtraBackup brings the possibility of creating ZIP archives of multiple folders and files. It is thus possible to backup all of your important data – photos, movies, documents, music, applications, and videos – in a single ZIP archive file. This is a solution that many consider essential, since it ensures full security for the data, and the opportunity to restore it. The possibilities of this software are extremely high. It is possible to create ZIP archives from individual folders or from a long list of folders and filenames (you can use this feature to easily add all your folders to an archive before creating it, as a great convenience to work with). It is also possible to create ZIP archives with special file attributes. It is thus possible to create, for example, compressed ZIP archives that are password-protected. This is a feature that many people use, since it is convenient to keep secrets private and protected, and it also helps avoid tampering with such files by third parties. By using the included wizard guide, it is possible to configure and customize the application to fit your needs. Providing extensive configuration options, the program is designed to allow users to fully personalize its operation to work as they wish. Users are provided with information and guidance when setting up the application. It is enough to launch the setup wizard to enjoy the installation of this application.
