On top of that, the tool may be set to clean up the disk (e.g. invalid start menu items, Internet Explorer cache, Windows temporary files, Recycle Bin) and to remove traces from your system (e.g. recent documents list, start menu Run list, MS Office recent files, Internet Explorer cookies and typed URLs). Once the scanning procedure is done, you can find out the total items of scanned registry entries, cookies and files, discovered errors and elapsed time. So, you can select which issues you want to resolve, and let NETGATE Registry Cleaner take care of the procedure. In addition, you can backup and restore data, manage applications which automatically run at system startup, uninstall programs from your computer, and schedule tasks (once or on a regular basis).
