

Buy Hydroquinone Generic Cream | DayNightDrugs

Hydroquinone (2%) + Mometasone (0.1%) + Tretinoin (0.025%) is a combination of three medicines that are used for the treatment of acne and lightens light brown color patches on the skin. Hydroquinone is a skin-lightening medicine and reduces the amount of a skin pigment that causes darkening of the skin. Generic hydroquinone, mometasone, and tretinoin cream are available on DayNightDrugs.
