# DENTAL BRACES SHARJAH

At Al Shourouk Polyclinic, we recognise that each patient's demands and preferences are distinct, just as every smile is. For this reason, we provide a variety of dental braces Sharjah alternatives to meet different orthodontic needs. We have the answer for you, whether you're looking for lingual braces, clear aligners, covert ceramic braces, or conventional metal braces. Every kind of braces has unique qualities, advantages, and applicability based on the requirements and preferences of the patient. Conventional metal braces are strong and efficient in treating a variety of orthodontic problems. Because ceramic braces match in with teeth's natural colour, they provide a more cosmetically acceptable solution.
